

**Model Number: 15227**

**Bluetooth adapters Transmitters Receivers**

## Features:

- **Portable and Lightweight** Ideal for various audio applications in different environments.
- **Transmitter Mode** Wirelessly transmits audio from non-Bluetooth devices like TVs, home stereo systems, or CD players to Bluetooth headsets or speakers.
- **Receiver Mode** Wirelessly receives audio from Bluetooth enabled devices (e.g., smartphones, tablets, or computers) and plays it through wired speakers, headphones, or car audio systems.

- **Mode Switching**

**Power On:** Plug the device into a USB port for power (requires 5V output).

**Default Mode:** The device starts in transmitter mode by default (Red LED indicator).

**Switching Modes:** Press and hold the side button for more than 3 seconds to switch between transmitter and receiver modes.

- **Usage Instructions**

Receiver Mode (Green LED Indicator):

Plug the adapter into a USB power source.

Enable Bluetooth on your device and pair it with "B16."

Use the 3.5mm cable to connect the adapter to speakers, car audio systems, or wired headphones.

- **Transmitter Mode (Red LED Indicator):**

Plug the adapter into a USB power source.

Use the 3.5mm cable to connect the adapter to a TV, computer, or other audio output devices.

The adapter will search for nearby Bluetooth receivers (e.g., speakers or headsets).

- **Compact Design** Small, lightweight, and easy to carry.

- **Wide Compatibility** Suitable for use with computers, laptops, home stereo systems, headsets, smartphones, MP3 players, CD players, and more.
